

Chalkwell Avenue PDL  
Spring 2025 Update

Good progress has been made on site and the project is on track to be completed by the late summer 2025. The steel frame and blockwork is now up to the second level, and the target is to get the roof done by early Spring.

Once the property is wind and watertight the team will start internal work on all the flats concurrently.

Another update will be provided later in the Spring.
