

Work is progressing on site at the Upper Bond St development. The first fix 'electrical and mechanical' is 90% complete. The fire boarding is done and the fire stopping has started. There are four flats which are now boarded and plastered. The kitchens for the show flats have arrived. Outside the drainage is fitted on both sides and the team is now preparing the ground for block paving.

Another update will be provided later in the year.

Upper Bond St PDL  
September 2024 Update
